

PRADEEP LODHI

Web Developer | Software Developer

Indore, Madhya Pradesh, India | pradeeplohdh86@gmail.com

LinkedIn: linkedin.com/in/pradeep-lodhi-42a4aa340 | GitHub: github.com/Pradeeplohdh

PROFESSIONAL SUMMARY

Motivated and detail-oriented developer with hands-on experience in web development, programming, databases, and software technologies. Skilled in building responsive web interfaces, developing practical applications, working with APIs, managing databases, and solving programming problems. Interested in creating clean, functional, secure, and user-friendly digital solutions.

TECHNICAL SKILLS

Web Development: HTML, CSS, JavaScript, Responsive Web Design

Backend: PHP, JavaScript, APIs

Programming: Java, Python, C, C++

Database: MySQL, SQL

Tools: Git, GitHub, VS Code, XAMPP, phpMyAdmin

Core Concepts: Object-Oriented Programming, Database Connectivity, REST APIs, Problem Solving

PROJECTS

YUGO — Unified Mobility Platform

- Designed a unified mobility platform concept connecting rural and urban transportation.
- Planned features covering transportation, student mobility, healthcare rides, and driver participation.
- Developed business, technology, operational, and social-impact concepts for the platform.

Smart City Waste Tracker

- Designed a web-based concept for monitoring and managing waste collection activities.
- Planned an intuitive interface for tracking waste-related operations and improving visibility.
- Focused on practical digital workflows and user-friendly interaction.

Neurocare Hospital Website

- Designed a healthcare website concept focused on neurological care and patient services.
- Planned doctor information, appointment and token management, online consultation, and patient document uploads.
- Explored modern web technologies for a scalable healthcare platform.

DEVELOPMENT EXPERIENCE

- Developed responsive websites using HTML, CSS, and JavaScript.
- Worked with MySQL databases and SQL queries.
- Practiced backend development using PHP and JavaScript.
- Worked with APIs and database connectivity.
- Used Git and GitHub for source-code management.
- Developed programming solutions using Java, Python, C, and C++.
- Practiced data structures, algorithms, object-oriented programming, and problem solving.
